

BYTECURVE

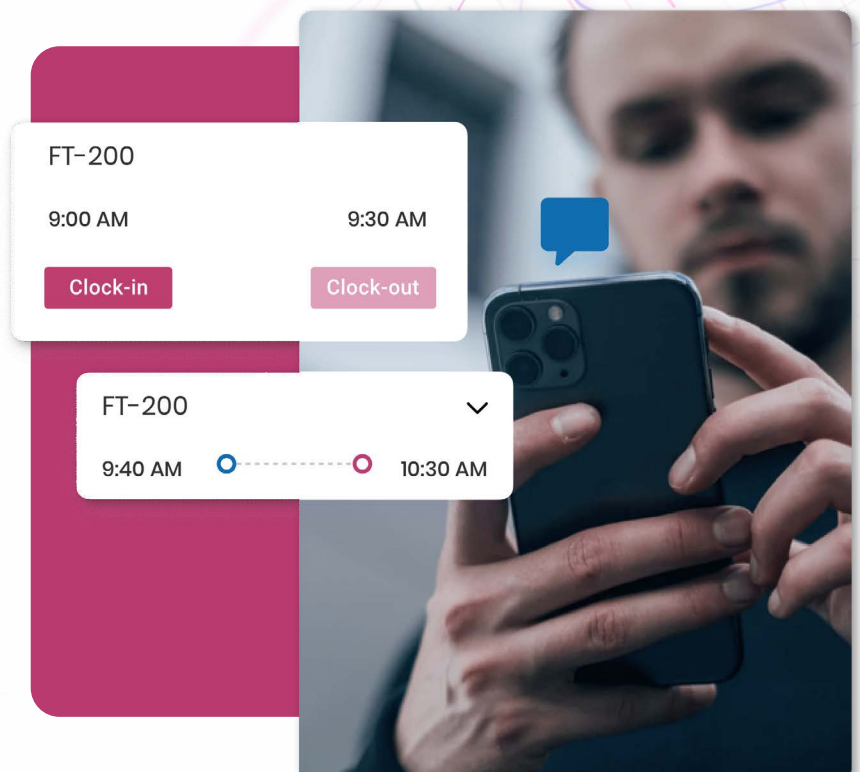

Driver Communications

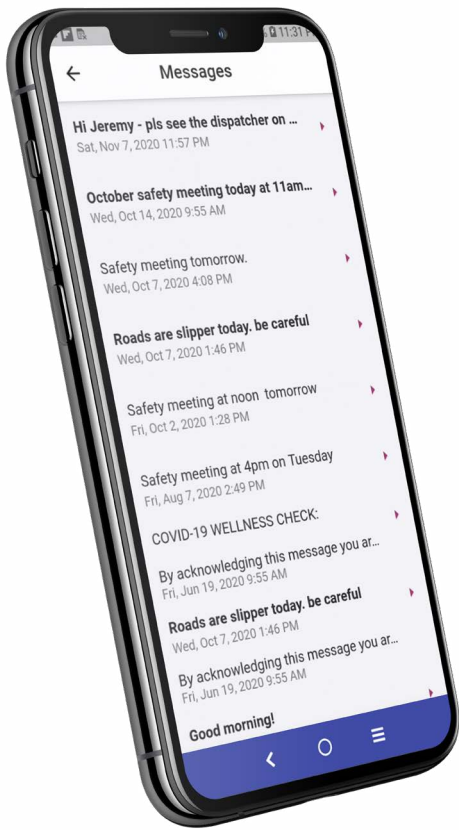

Say goodbye to delayed response from drivers and verbal confirmation to route and schedule changes. And say hello to instant verifications so you can know your routes are covered and your drivers assigned appropriately.

Far more than simply clocking-in, and messaging. The DriveOn app connects drivers on-the-go with the dispatch team for real-time, flexible schedule changes.

Dispatch can change routes, drivers and vehicles on the fly, and receive instant verification the drivers knows their new assignment, improving responsiveness and on-time arrivals.

DriveOn: Your instant verification APP AND EMAIL MESSAGING FOR IMPROVED DRIVER MANAGEMENT

Dispatchers and Supervisors can send push notifications and/or email messages to a specific employee, group of employees, or all employees.

Schedule recurring messages or future messages to communicate with employees.

VIEW SCHEDULES

Drivers can view their hours worked for previous 4 weeks and current day schedule.

Times changes or new tasks are added generate auto notifications to reflect changes in dispatch system.

The app is trusted by more than 40,000 drivers across North America to help them deliver safe, on-time student transportation services.

It's always free, intuitive and makes it a snap for drivers and dispatchers to stay connected in real time.
